

# CLUB ROAD RACE RECORDS

**ABOUT** - These are the official club road race records achieved by runners in races as members of Tavistock Athletic Club. They show the best 3 times in each of the age categories: They cover distances of 5k, 10k, 10 miles, Half Marathon and Marathon.

**UPDATING THESE RECORDS** - If you consider that you have achieved a time better than those published then email **Allan Herdman** at [allanherdman66@gmail.com](mailto:allanherdman66@gmail.com) with your name, event distance, event name, event date, age category and time. A link to the published results, ideally those shown on Power of 10/Run Britain Rankings would also be useful.

**AGE GRADES** - Age-Grading is an internationally recognised way of measuring your running performance taking into account your age and gender. It enables you to produce a percentage score for each run based on how old you were when you did the competition comparative to world class performances. As we get older it is reasonable to expect that we won't be able to run at the speeds we achieved when we were young. This can be demotivating for runners who are 'past their peak' even if they are running well for their age. So, rather than focusing solely on how fast you are running, it can be more motivating to focus on your Age-Graded performance.

Finally on Age Grading. The official gradings can calculate your result based on your actual age on the day of the race. For this database to compute the exact grading we would need to know the runner's date of birth and age on race day as well as the date of the race itself. Many of these records are historic so to gather this information would be an arduous task. Therefore we are basing these Age Grade performances based on the first year standard of the 5 year category eg if you are 53 years old your grade will be calculated based on the standard for a 50 year old. So, celebrate whatever grading is shown if your name appears on here . . . but treat it as a good guide only!

**PARK RUN RESULTS** - You might also note that some of the 5k records shown here are based on Park Run results. Strictly we should not include these here as Park Runs are administered under different rules to those staged under UKA or ARC licences. The courses are measured differently and the event management is not as stringent. However, for now those Park Run results shown will remain but no new ones can be submitted. We are considering adding a separate Park Run table and will call out for bids to be included.

*Last updated 20 April 2026*
